SAVE THIS MANUAL FOR FUTURE REFERENCE

This manual contains important information regarding safety, operation, and maintenance.

INTRODUCTION

Thank you for purchasing this superior quality pressure washer. When operating and maintaining this product as instructed in this manual, your pressure washer will give you many years of reliable service.

Product Specifications:

Type	SPPW212
Rated pressure	23.4MPa
Allowable pressure	25.4 MPa
Rated flow	588 l/h
Max. flow	618 l/h
Max. water intake temperature	40°C
Max. inlet water pressure	0.55 MPa
Water hose diameter	Min. ø14mm
Kickback force on lance	28 N
DECLARED SINGLE-NUMBER NOISE EMISSION VALUES (In accordance with EN ISO 4871:1996)	
The guaranteed A-Weighted sound power level, $L_{WA\text{d}}$ (ref. 1 pW)	105 dB(A)
Values determined according to noise test code given in Annex CC of EN 60335-2-79:2012, using the basic standard EN ISO 3744:2010.	
NOTE: Declared single-number noise emission values are the sum of measured values and the associated uncertainty, and they represent upper boundaries of the range of values which is likely to occur in measurements.	
DECLARED VIBRATION EMISSION VALUES OF A SINGLE MACHINE (In accordance with EN ISO 12096:1997)	
Measured vibration emission value α	
Handle of trigger gun	0.828 m/s ²
Middle of trigger gun	2.068 m/s ²
Values determined according to vibration test code given in Annex DD of EN 60335-2-79:2012, using the basic standard ISO 5349-1:2001.	
Engine	
Model	DH212
Displacement	212cc
Power	4.3kW/3600rpm
Fuel tank capacity	3.6 L

INTRODUCTION

The emissions control system for this pressure washer is compliant with all standards set by the Environmental Protection Agency.

Product Applications:

- This pressure washer is designed to remove dirt and mold from house siding, decks, garage floors, brick patios, and cement walkways.
- This unit can be used to clean cars, motorcycles, boats, RV's outdoor furniture, lawn equipment, and grills.

Record the following information bellow for service or warranty assistance.

Date of Purchase:

Serial Number:	

SAFETY RULES

Safety Symbols

WARNING!

Indicates a potentially hazardous situation which could result in serious injury or death if not avoided.

CAUTION!

Indicates a potentially hazardous situation which could result in damage to equipment or property.

Never point the jet at people, animals, the device itself or live electrical devices.

Slippery surface

Risk of fire

Risk of explosion

Carbon monoxide

Risk of electric shock

Hot surface

Eye protection

Safety footwear

The unit is not suitable for use with a drinking water supply!

Safety Instructions

This machine must be attended during operation. The manufacturer cannot anticipate every possible hazardous circumstance that the user may encounter. Therefore, the Warning!s in this manual, on tags, and on affixed decals are not all-inclusive. To avoid accidents, the user must understand and follow all manual instructions and use common sense.

WARNING!

Read and understand this manual in its entirety before operating this pressure washer. Improper use of this pressure washer could result in serious injury or death.

WARNING!

This machine has been designed for use with the cleaning agent supplied or recommended by the manufacturer. The use of other cleaning agents or chemicals may adversely affect the safety of the machine.

WARNING!

Do not use the machine within range of persons unless they wear protective clothing.

- Spray from this unit has extreme pressure and can ricochet back splashing water or propelling objects towards eyes.
- Never substitute eye protection with dry condition goggles.
- Pressure washer can create puddles and slippery surfaces. Never wear sandals, always wear protective footwear.
- Operate pressure washer from a level and stable surface.
- Do not operate from a ladder, scaffolding, or uneven surface as recoil from spray gun could cause you to fall.
- Do not over-extend yourself in attempt to reach a little further.

WARNING!

Do not direct the jet against yourself or others in order to clean clothes or foot-wear.

SAFETY RULES

WARNING!

Risk of explosion - Do not spray flammable liquids.

WARNING!

High pressure cleaners shall not be used by children or untrained personnel.

WARNING!

High pressure hoses, fittings and coupling are important for the safety of the machine. Use only hoses, fittings and couplings recommended by the manufacturer.

WARNING!

To ensure machine safety, use only original spare parts from the manufacturer or approved by the manufacturer.

WARNING!

Water that has flowed through backflow preventers is considered to be non-potable.

WARNING!

The machine shall be disconnected from its power source during cleaning or maintenance and when replacing parts or converting the machine to another function.

WARNING!

Do not use the machine if a supply cord or important parts of the machine are damaged, e.g. safety devices, high pressure hoses, trigger gun.

WARNING!

Do not use combustion engine powered machines indoors unless adequate ventilation is assessed by national labour authorities.

- Carbon monoxide gas is a poisonous, odorless gas that can cause headache, confusion, fatigue, nausea, fainting, sickness, seizures, or death. If you start to experience any of these symptoms, **IMMEDIATELY** get fresh air and seek medical attention.
- Never use indoors, in a covered area, or in a confined space, even if doors and windows are open.

WARNING!

Ensure that any exhaust emissions are not in the vicinity of air intakes.

WARNING!

For gas or oil-heated machines it is important to provide adequate ventilation and make sure that the flue gases are properly discharged.

WARNING!

Incorrect fuels shall not be used as they may prove hazardous

WARNING!

Never spray near a power source such as an electrical outlet. Making contact with a power source could cause an electric shock or burn.

SAFETY RULES

WARNING!

Stay alert and use common sense. Do not operate this unit if you are under the influence of alcohol, drugs, medication or you feel tired.

WARNING!

High pressure jets can be dangerous if subject to misuse. The jet must not be directed at persons, live electrical equipment or the machine itself.

- The high pressure stream of water produced can cut through skin and underlying tissue. Never squeeze the trigger or point the spray gun at other people, animals, plants, or fragile objects such as glass, even if the engine is stopped.
- This unit is not a toy. Keep unit away from children and pets.
- Do not leave spray gun unattended while unit is running.
- Make sure the spray gun, nozzle, and accessories are attached correctly.
- Never attempt to repair high pressure hose, always replace.
- Never attempt to repair leaks with sealant, always replace O-ring or seal.
- Never attempt to connect or disconnect hose from pump or spray gun while system is pressurized.
- Always release water pressure from unit every time you stop the engine.

WARNING!

Avoid contacting hot areas of this unit.

- Use caution around the muffler and other engine parts as they can be extremely hot.
- Allow hot components to cool before touching.

WARNING!

Moving parts can catch on clothing, jewelry, and hair.

- Do not wear loose clothing or gloves.
- Remove jewelry or anything else that could be caught in moving parts.
- Tie back or wear protective head covering to contain long hair.

WARNING!

Keep engine away from flammable objects and other hazardous materials.

- The fuel and its vapors used to power this unit are highly flammable and could explode resulting in serious injury or death.
- Never overfill fuel tank. If fuel spills, move the unit at least 30 feet away from the spill and wipe up any remaining fuel on the unit before starting the engine.
- Never smoke while operating or fueling this unit.
- Never operate or store this unit near an open flame, heat, or any other ignition source.
- Keep engine free of grass, leaves, or grease which are flammable.
- When adding or draining fuel, unit should be turned off for at least 2 minutes to cool before removing fuel cap. If unit has been running the fuel cap is under pressure, remove slowly.
- To keep fuel from spilling, secure unit so it cannot tip while operating or transporting.
- When transporting unit, disconnect the spark plug wire and make sure the fuel tank is empty with the fuel shutoff valve turned to the off position.

WARNING!

This machine can be used by people with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the machine in safe way and understand the hazards involved.

PRESSURE WASHER FEATURES

A - High Pressure Hose

B - Fuel Tank

C - Choke

D - Fuel Valve Lever

E - Soap Tank

F - Handle

G - Spray Gun

H - Locking Trigger

I - Pull Cord

J - Engine Switch

K - Dipstick

L - No Flat Foam Filled Tires

M - High Pressure Hose Outlet

N - Water Inlet

ASSEMBLY

Attaching Foot Assembly (See fig 1)

- Parts needed - 1 foot, 1 M8 lock nuts.
- Raise or tilt pressure washer so you can line up foot with the hole located at the centre of the frame.
- Align the rubber foot with the hole in the frame where the foot is to be located. Attach foot by inserting the bolt from the bottom up and install the acorn nut. Wrench tighten until there is a slight crush on the frame tube. (Do not over tighten)

Install Handle (See fig 2)

- Install upper frame (handle) onto the lower frame by sliding the handle over the two upright tubes on the lower frame and pressing down firmly until the handle is seated and the two detent pins snap in place.

FIG 1

FIG 2

Attaching Upper and Lower Gun Hooks (See fig 3)

- Attach the upper gun hook, install two plastic rivets, until the plastic rivets are snug, you may need to tap with a mallet or small hammer to seat the lock pin.
- Attach the lower gun hook, install the M6 screw & lock nut, wrench tighten until the nut is snug, do not over tighten.

FIG 3

ASSEMBLY

Attaching the Spray Gun (See fig 5 & 6)

- Screw the spray wand and the trigger handle together until they are secure.
- Insert the inlet coupler of the spray hose into the threaded fitting on the high pressure spray gun and thread the black nut on by turning clockwise until it is hand tight.

FIG 5

FIG 6

ASSEMBLY

Adding / Checking Engine Oil (See fig 7)

- Place pressure washer on a level surface.
- Remove one or both of the crankcase dipsticks to ensure you do not overfill the engine.
- Carefully add between 520 ml (17.6 oz) of 4-Cycle engine oil (SAE10W30) to empty reservoir until oil reaches the outer edge of the oil fill hole (Crankcase Dipstick hole).
- Be sure to replace both dipsticks before attempting to start the engine.
- To check oil, set pressure washer on a level surface, wipe dipstick clean, then reinsert dipstick without re-threading.

FIG 7

Adding Fuel (See fig 8)

- Set pressure washer on a clean and level surface in an area that is well ventilated.
- Open the fuel fill cap and fill it with commercial unleaded gasoline containing not more than 10% ethanol (E10).

CAUTION!

Oil must be added to unit prior to first use.

CAUTION!

To avoid spillage, do not overfill fuel tank as gasoline expands.

FIG 8

ASSEMBLY

Connecting Garden Hose to Pressure Washer (See fig 9)

- Run water through the hose for a few seconds to flush any debris from the hose.
- Inspect inlet screen and remove any debris.
- Connect hose to water inlet and tighten by hand. There must be a minimum of 10 feet of unrestricted hose between pressure washer and faucet or shut off valve.
- Turn on water.
- Purge the system's pump of air by releasing the safety and squeezing the trigger of the spray gun.

CAUTION!

Do not run pump without connecting to the water supply and turning water on. Failure to do so could damage the pressure washer. Failure to follow these instructions will void product warranty. The unit is not suitable for use with a drinking water supply!

FIG 9

Connect High Pressure Hose to Pump (See Fig 10)

- Attach end of high pressure hose to the high pressure outlet on pump.
- Follow the same procedure with opposite end to attach high pressure hose to spray wand.

FIG 10

OPERATION

Pre-Operation Check List

- Read and understand this operator manual in its entirety before operating pressure washer.
- Check oil level and add oil to the proper level if low.
- Check fuel level and add fuel if needed.
- Check connections of handle and all hoses to make sure they are secure.
- Check all hoses for kinks and damage.
- Check flow of water supply and make sure it is adequate (2.8 - 5.6bar).

WARNING!

Do not operate indoors or in a confined space preventing dangerous carbon monoxide gas from dissipating.

- Carbon monoxide gas is a poisonous, odorless gas that can cause headache, confusion, fatigue, nausea, fainting, sickness, seizures, or death. If you start to experience any of these symptoms, **IMMEDIATELY** get fresh air and seek medical attention.
- Never use indoors, in a covered area, or in a confined space, even if doors and windows are open
- Keep exhaust from this unit from entering a confined area through windows, doors, vents, or other openings.
- When working in areas where vapors could be inhaled, use a respirator mask according to all of its instructions.

CAUTION!

Do not run pressure washer with a damaged hose. Do not run pressure washer without first connecting and turning on water supply or damage to the pressure washer could result. FAILURE TO FOLLOW THESE INSTRUCTIONS WILL VOID PRODUCT WARRANTY.

Starting Pressure Washer (See Fig 11-12)

- Place pressure washer on a level surface.
- Turn on water.
- Purge the system's pump of air by releasing the safety and squeezing the trigger of the spray gun.
- Attach wand/lance to spray gun.
- Turn fuel valve to the ON position.
- Slide the choke lever to the "Choke" position.
- Turn the engine OFF/ON switch to the "ON" position.
- Holding the machine with your hand, pull the recoil handle (starter cord) slowly until resistance is felt, then pull rapidly. Squeeze the Gun trigger and release the pressure after every failed attempt to start the pressure washer (This will reduce the back pressure).
- Let engine run for several seconds and then gradually slide the choke lever to the RUN position as the engine warms up until the choke is fully slid to the RUN position.

FIG 11

FIG 12

OPERATION

WARNING!

Pull cord recoils rapidly and pulls arm towards engine faster than you can let go which could result in injury.

- Always relieve pressure from spray gun before pulling starter cord, including every failed attempt to start engine.
- To avoid recoil, pull starter cord slowly until resistance is felt, then pull rapidly.

Stopping Pressure Washer (See Fig 13)

- Turn the on/stop switch to the OFF position.
- Turn the fuel valve to the OFF position.
- Turn off water and squeeze the trigger handle to release all water pressure.

FIG 13

Using the Spray Gun (See Fig 14 - 15)

- Flip the lock tab behind the trigger up or down until it clicks to apply or remove the safety. Pull back on the trigger to begin operating pressure washer.
- To stop water flow, release trigger.

FIG 14

FIG 15

WARNING!

Kickback forces result from pressing the trigger! Therefore, always hold the spray gun with both hands! Pay attention to safe posture! Improper handling can lead to injuries!

Using Spray Nozzle (See fig 16-17)

- To connect or disconnect spray tip, pull back on the quick-connect collar. Insert or remove spray tip then release collar.
- When spray tip is connected, pull on the spray tip to make sure it is secured.
- For general cleaning use the 40° spray tip. This option is for cement walkways.

OPERATION

- For stripping, spot cleaning, blasting, and hard to reach areas use the 25° spray tip. This option is for removing paint, rust, mildew, marine growth off boats, or grease stains. This option can be used for reaching second story surfaces, or for the removal of paint, rust, oil stains, tar, gum, and other stubborn substances. Use extreme caution when using this nozzle.
- For applying pressure washer safe detergent, use the black soap nozzle.
- The angle of the nozzles shown indicates the spray “fan shape” projected from the nozzle when the trigger of the spray gun is pulled and high pressure water is passing through the nozzle. The pressure and flow will not change significantly due to the various fan patterns (Nozzles).

FIG 16

Applying Detergent

- Rinse surface with cool water before applying cleaner.
- Prepare detergent as required by job. For best results follow detergent directions as supplied from manufacturer.
- Remove cap from detergent container and fill.
- Spray detergent on surface. For best results use long, even, and overlapping strokes. Allow detergent to set for about 3 minutes before rinsing, but do not allow detergent to dry on surface or it may cause streaking or cause damage to the surface. Use good judgment.
- To clean equipment after use, flush water through the spray nozzle for 1-2 minutes then shut off engine. Soak nozzle in a bucket of clean water to remove detergent.

WARNING!

Only use mild, environmentally friendly detergents intended for use in pressure washers. Ask at your specialist dealer about these special products. Never use aggressive chemicals (eg bleach), abrasive detergents or similar to avoid damage to your health, the product and the environment.

WARNING!

Avoid skin contact with detergents, in particular contact with eyes! If detergents gets in your eyes flush your eyes with clean water and seek immediate medical attention!

Rinsing with the Pressure Washer

- Test a small area first to avoid surface damage.
- Rinse from top to bottom using long, overlapping strokes.

Moving the Pressure Washer

- Turn the pressure washer off.
- Tilt unit towards you until it is balanced on its wheels.
- Roll machine to desired location.

MAINTENANCE

Regular maintenance will extend the life of this pressure washer and improve its performance. The warranty does not cover items that result from operator negligence, misuse, or abuse. To receive full value from the warranty, operator must maintain the pressure washer as instructed in this manual, including proper storage.

WARNING!

Before inspecting or servicing this machine, make sure the engine is off and no parts are moving. Disconnect the spark plug wire and move it away from the spark plug.

Pre-operation Steps

Before starting the engine, perform the following pre-operation steps:

- Check the level of the engine oil and the fuel tank level
- Make sure the air filter is clean.
- Remove any debris that has collected on the pressure washer.
- Check water inlet screen for damage. Clean inlet screen if it is clogged.
- Check high pressure hose for damage.
- Briefly run garden hose to flush out any debris or insects.
- Inspect the work area for hazards.

Remove Debris

- Clean any debris that has collected around or behind the muffler, cleaning system, and controls.
- Use a damp cloth to wipe exterior surfaces. If dirt is caked on, use a soft bristle brush.

After Each Use

Follow the following procedure after each use:

- Shut off engine and turn off water supply. Release water pressure by pointing spray gun in a safe direction and squeezing the trigger.
- Disconnect high pressure hose, spray gun, and nozzle. Drain water from items and use a rag to wipe down the outside of the hose and spray gun.
- Empty the water from the pump by pulling the recoil starter 6 times.
- Store unit in a clean and dry area.
- Use of a pressure washer pump conditioner is recommended, follow the instructions provided by the manufacturer of the pump conditioner.

Maintenance Schedule

After First 5 Hours	Change Engine Oil
After Each Use	Check and Clean Water Inlet screen
	Check High Pressure Hose
	Check and Clean Detergent Siphoning Tube
	Check Spray Gun for Leaks
	Clean Debris
	Check Engine Oil Level before starting
Annually (20 hr Use)	Change Engine Oil (Service more often under dirty or dusty conditions)
Annually (50 hr Use)	Check and Clean Air Filter
	Check muffler and spark arrester
Annually (100 hr Use)	Service or Replace Spark Plug

MAINTENANCE

Changing Engine Oil

Engine oil will drain better if the engine is still warm, but not hot.

- Shut off engine.
- Clean the area around the oil fill cap/dipstick to keep out debris then remove oil fill cap/dipstick.
- Place an oil pan on the ground to catch oil. Remove oil plug then tilt pressure washer back and to the side to empty out the oil from the crankcase.
- Once oil is completely drained, return the pressure washer to a level position and install the oil drain plug. Refill the engine with new oil as instructed earlier in this manual under Adding/Checking Oil.

Checking Detergent Siphoning Tube

- Check the detergent siphoning tube for clogs, leaks, or tears.
- Make sure the tube fits tightly to the pump fitting.
- Replace siphoning tubes if damaged.

WARNING!

Never repair high pressure hose or use unit if hose is damaged. If hose is damaged replace with identical part.

High Pressure Hose

- Inspect hose for cuts, bulges, or leaks which can develop from kinking or wear. If damage is found, immediately replace hose.
- Inspect couplings for damage. Immediately replace hose if damage is found.

Spray Gun

- Make sure the spray gun is connected securely.
- Inspect the spray gun safety and make sure the spray gun trigger springs back upon release.

Spray Nozzle

If a pulsing sensation is felt while squeezing the trigger, the spray nozzle may be dirty or clogged and should be cleaned immediately.

- To clean the nozzle, shut off the engine and turn off the water.
- Remove the nozzle from the spray wand making sure that the nozzle is pointing away from you and in a safe direction.
- Use the nozzle cleaner or a small paper clip to dislodge any foreign materials which are clogging or restricting the spray tip.
- Flush debris out of the nozzle by back flushing with a garden hose for 30-60 seconds.
- Reconnect the nozzle to the spray wand.
- Turn the water supply back on and start engine.

MAINTENANCE

Checking Spark Plug

- Disconnect the spark plug wire from the spark plug.
- Before removing the spark plug, clean the area around its base to prevent debris from entering the engine.
- Clean carbon deposits off the electrode with a wire brush.
- Check the electrode gap and slowly adjust to 0.80mm (0.031in.) if necessary.
- Reinstall spark plug and tighten to Torque 22.0 – 26.9 Nm (16-20 ft-lb).
- Reconnect spark plug wire.
- If spark plug is worn replace only with an equivalent replacement part. Spark plug should be replaced annually.

WARNING!

Water pressure produced by this unit can cut through skin and tissue leading to serious injury and possible amputation.

- Never attempt to repair high pressure hose, always replace.
- Never attempt to repair leaks with sealant, always replace O-ring or seal.

Repairing Leaking Connections

- Purchase O-Ring / Maintenance kits through the nearest authorized service center and follow instructions provided with kit.

Air Filter

A dirty air filter will reduce the life span of the engine, make starting the engine difficult, and reduce the unit's performance.

- To clean, remove the air filter cover.
- Carefully pull the air filter out by lifting up along the edges.
- Remove dirt from filter by tapping on it or having it blown out.
- Reinstall air filter so that it seals and replace air filter cover.

WARNING!

Storage cover could be flammable. Let engine cool before covering pressure washer.

Storing Pressure Washer

If storing pressure washer for 30 days or more follow the procedures below:

- Let the machine continue to run until the fuel is completely depleted and the engine automatically stops.
- Add PumpSaver to protect pump from freezing or damage caused by mineral deposits.
- Empty fluid from all hoses and pump.
- Disconnect the spark plug wire and clean the spark plug. Leave spark plug wire disconnected.
- Clean the air filter.
- Cover unit with a suitable protective cover to keep unit dry.
- Store unit in a frost-free area.

TROUBLESHOOTING

PROBLEM	CAUSE	SOLUTION
Engine does not start	1. Out of fuel 2. Engine oil low 3. Spark plug wire disconnected from spark plug 4. Bad spark plug 5. Spark plug wire has shorted 6. Ignition inoperative	1. Fill fuel tank 2. Add engine oil 3. Connect spark plug wire 4. Replace spark plug 5. Contact service center 6. Contact service center
Engine hard to start	1. Stale fuel or water in fuel 2. Spark plug producing weak spark 3. Excessively rich fuel mixture	1. Drain fuel and refill with fresh gasoline. 2. Contact service center 3. Contact service center
Engine lacks power and vibrates excessively	1. Dirty air filter	1. Clean air filter
Engine quits during operation	1. Out of fuel	1. Fill fuel tank
Engine loses power when load is added	1. Engine speed is too slow	1. Move throttle to fast. If this does not correct problem, contact service center.
Water pressure is weak	1. Water supply is restricted. 2. Water not turned on to full power 3. Not using high pressure nozzle	1. Inspect garden hose for kinks or leaks. Make sure you are using a large enough garden hose (min. ¾ inch diameter) 2. Open water source all the way. 3. Change nozzle
Detergent and spray do not mix	1. Detergent hose is not submerged or has disconnected 2. Black soap nozzle needed	1. Make sure hose is connected and submerged in the detergent. 2. Install soap nozzle
Pump fails to produce pressure or pressure is inconsistent	1. Water supply is restricted 2. Water not turned on full power 3. Nozzle is clogged 4. Spray gun leaks 5. Air in line 6. Inlet hose screen is clogged 7. Water supply is over 100°F 8. Pump is faulty	1. Inspect garden hose for kinks or leaks. Make sure you are using a large enough garden hose (Min. ¾ inch diameter) 2. Open water source all the way. 3. Clean nozzle 4. Check spray gun connection or replace spray gun 5. Squeeze trigger handle to remove air 6. Clean inlet 7. Use cool water supply 8. Contact service center

EC DECLARATION OF CONFORMITY

**For the following machinery**

- Product name: Petrol Pressure Washer
- Model No.: SPPW212
- Commercial name: Pressure Washer
- Function:
- Type: Gasoline
- Serial No.:

is herewith confirmed to fulfill all the relevant provisions of

- Machinery Directive (2006/42/EC)

and the following harmonized standard have been complied with

- EN 60335-1:2012
- EN 60335-1:2012/A11
- EN 60335-2-79:2012

is herewith confirmed to fulfill all the relevant provisions of

- Electromagnetic Compatibility Directive (2014/30/EU)

and the following harmonized standard have been complied with

- EN 61000-6-1:2007
- EN 55012:2007+A1

is herewith confirmed to fulfill all the relevant provisions of

- Noise Emission Directive by equipment for use outdoors (2000/14/EC + 2005/88/EC) **and**

conformity Assessment Procedure: 2000/14/EC, amended by 2005/88/EC- Annex VI

- Measured Sound Power Level – L_{WA} 105 dB(A)
- Guarantee Sound Power Level – L_{WA} 105 dB(A)
